

Mould Release Agent

## PROMOL 1265

PROMOL 1265 provides a reliable release effect for various applications in the manufacture of rubber articles (e.g. automotive rubber parts, shoe soles, pre-cured treads for tire retreading ...). PROMOL 1265 allows for the moulding of rubber articles with an averagely complex shape due to its good separation effect.

The product offers numerous advantages:

- silicone free
- supports mould flowing characteristics
- very good release on most polymers
- very good lubricating effect on rubber to metal
- high compatibility with compounds

### AVAILABLE PACKAGING

DESCRIPTION	NET QUANTITY
IBCs	1.000 kg
Steel drums	200 kg
HDPE jugs	10/20 kg
