

Mould Release Agent

PROMOL PK

PROMOL PK is a single-release, water based, silicone containing mould release agent, providing very efficient release effect for various applications in rubber manufacturing (molded rubber parts, pre-cured treads, shoe soles, solid tires).

The product offers numerous advantages:

- reduced mould contamination, less cleaning cycles and higher productivity
- rubber articles cured with PROMOL PK do usually not have a slippery surface
- high cost efficiency

AVAILABLE PACKAGING

DESCRIPTION	NET QUANTITY
