

Tire Inside Paint

PROMOL TI 1311BK

PROMOL TI 1311BK is a ready-to-use water-based, solvent free, tire inside release agent containing silicone and carbon black. The aqueous dispersion provides very good release and slip between the bladder and the unvulcanized tire. PROMOL TI 1311BK is usually applied to the green tire using automated or hand-held spray guns.

The product offers numerous advantages:

- water-based, solvent free
- excellent release and slip properties
- eliminates trapped air during vulcanisation process
- pleasing appearance after curing
- stable dispersion
- fast drying
