

Mounting Lubricant

## PROMOL TU 4525/17

PROMOL TU 4525/17 is a water-based lubricant to facilitate mounting of cured tires on uniformity testing machines.

The product offers numerous advantages:

- free of silicones, soaps, solvents, oils and fillers
- balanced lubrication effect for easy mounting while avoiding slip
- improvement of testing consistency and test method accuracy
- optimization of throughput and capacity use of uniformity testing machines
- fast drying after testing
- does not leave any visible residues on the tire
- protection against corrosion
